MORE THAN EVER: *Ceramic in Essence*

We have planned this new show as a return to the Essence of Newker, to the Essence of Ceramics. Hereby we propose 8 new collections with the same concept: to seek the soul of ceramic materials and products.

We present natural materials in which their richness has been respected to the maximum and their roots have been investigated, but also taking advantage of the most innovative techniques offered by ceramics.

A way to return to our origins while looking to the future.

Hemos planteado esta nueva feria como una vuelta a la Esencia de Newker, a la Esencia de la Cerámica. Os proponemos 8 nuevas colecciones con un mismo concepto: buscar el alma de los materiales y productos cerámicos.

Presentamos materiales naturales en los que se ha respetado al máximo su riqueza y se ha investigado hasta llegar a sus raíces, pero también aprovechando las más novedosas técnicas que nos ofrece la cerámica.

Un camino para volver a nuestros orígenes sin dejar de mirar al futuro.

Duality

With the Duality collection we have created a new decoration concept. A careful selection of marbles that combine in pairs, thanks to their connection in colours, veins and details.

We have respected the nature of each of the marbles to the maximum, without modifying their colour or size. An exhaustive search for originals that has led to surprising combinations of materials.

We present the entire collection in a polished finish, and at the same time in a matt finish, very natural and pleasant to the touch.

Con la colección Duality hemos creado un nuevo concepto de decoración. Una cuidadosa selección de mármoles que combinan por parejas, gracias a su conexión en colores, vetas y detalles.

Hemos respetado al máximo la naturalidad de cada uno de los mármoles, sin modificar su color ni tamaño. Una búsqueda exhaustiva de originales que ha llevado a unas combinaciones de materiales sorprendentes.

Presentamos toda la colección en acabado pulido, y a la vez en un acabado mate, muy natural y agradable al tacto.
